# RODSUMWIRELESS

ENVIRONMENT MONITORING APPLICATIONS FOR CONSTRUCTION SITES

KNOW WHAT ARE HAPPENING AROUND YOUR PROJECTS. REPORT THROUGH WIRELESS NETWORK, LET YOU RESPONSE INSTANTLY WHEN NECCESSARY.

Water Detection Sensor

WATER LEAK/ ACCUMULATION DETECTION

Avoid slippery floor for workers and prevent potential water damages to assets/equipment.

Temperature & Humidity Sensor

RISK MONITORING

Monitor potential risks such as fires, personal health incidents like heat exhaustion, electrical hazards, and heat damage to construction materials.

Wireless Beacon

WORK WITH OTHER PURPOSE-BULTI SENSORS

Our wireless beacons are highly flexible, allowing it to easily connect to your designated sensors (e.g. smoke, noise detection) or equipment. This enables them to report the required data through your WiFi network. Let's talk.

WEB PLATFORM & MOBILE APP AVAILABLE

Single platform for all sensors selected. Real-time data, location and alert function included.
